Creativity through game-based learning at
higher education

Abigail López Alcarria

Abigail López Alcarria graduated in Pedagogy and holds a MA in Environmental Education at the University of Granada (Spain).

Actually, she is a professor at the Department of Research Methods and Diagnosis in Education from the Faculty of Education Sciences of the University of Granada. She teaches different subjects in the Social Education, Preschool and Primary Teacher Student, Speech Therapy, Pedagogy, Environmental Sciences and the Master's Secondary education degrees.

In addition, she has participated as a speaker in seminars and courses aimed at teacher training. On the other hand, she has participated in several training activities of pedagogical techniques for the improvement of teaching quality. She is currently participating as a collaborator in two teaching innovation projects aimed at the use of technological tools in the educational field.

Her research career is focused on the evaluation of the quality of curriculum greening in educational centers through educational programs such as Eco-schools or Agenda 21. Since 2011, she is an active member of the research group HUM-89 Evaluation in Environmental, Social and Institutional Education. In addition, she has participated in research projects at national and European level, related to the field of environmental education and sustainable development. She is also the author of different research articles and book chapters of national and international prestige.
