UNLOCK

Creativity through game-based learning at higher education

Nimer Ziadmanesh

Nimer Ziadmanesh holds a cross-disciplinary Master's degree in Design Management from the University of Southern Denmark and the Design School Kolding. For the past year he has been supporting and planning Futures Design projects and co-creation workshops involving various stakeholders across industries and geography. Besides the Unlock project, Nimer is also involved in the Urban Goodcamp project and several other Danish projects, promoting courses where professionals learn about Futures Design.

Nimer works in the crossfield of Design and Management and combines a designers mindset with a set of cross-disciplinary skills from project management, anthropology, and business, to help organisations develop strategy through collective engagement in imagination and futures.
